Financial Automation – 5 Trends to Watch for in 2020

By: Brian Shannon, Serrala

Look into the future and evaluate the top technology trends that will impact finance teams and improve business processes over the next decade. Get the details you need to build a process roadmap that will take full advantage of these technologies and maximize the business value of your company's digital transformation. This article will discuss the five biggest technology trends in finance: Intelligent Automation, Cloud and as-a-Service solutions, Real-time Connectivity, Big Data, Predictive Analytics. It will discuss how you can work with IT to ensure these technologies are implemented effectively and adequately support your team's business objectives.

As a new decade begins in 2020, financial leaders should take a moment to consider how technology will potentially impact their teams over the next decade. Certainly, robotic process automation (RPA), which gained significant momentum over the past decade, will continue to transform financial processes. But which technology trends are the ones to watch next? And where can this new technology possibly take us in the next 2, 5, or 10 years?
